

Bureau of Reclamation Extends Enterprise Functionality of Infolinx WEB

The U.S. Department of the Interior's Bureau of Reclamation procures additional functionality for their enterprise physical records management application Infolinx WEB.

(Vocus) January 27, 2010 -- Infolinx System Solutions, a leading provider of enterprise physical records management software, announced the procurement of application enhancements by the Bureau of Reclamation (BoR), extending the functionality of their enterprise physical records management application, [Infolinx WEB](#).

In response to a growing need within the industry to effectively manage pending litigation and its affect upon an organization's paper-based records, BoR asked Infolinx to incorporate additional functionality facilitating the lifecycle management of legal holds and their assoications to physical records.

"We continue to enjoy the relationship we have with BoR," said Tim Butler, Infolinx Managing Director. "It is a pleasure helping the BoR team realize their records management goals." Among other things, the new functionality enables BoR to create and manage an unlimited number of legal holds in a central repository and then globally apply or remove these holds to and from various subsets of their physical records inventory.

Infolinx System Solutions provides a feature rich application specifically supporting the labor intensive physical records management disposition process and is a leading provider of enterprise physical records management software to a broad range of commercial and government clients worldwide. Infolinx delivers regulatory compliant solutions for the complete life-cycle tracking of corporate physical records, maintaining clients within all major business segments and the public sector.
