

## Riverside Superior Court of California Targets Q1 2010 for implementation of Infolinx WEB Providing Full Life-cycle Management of Physical Records

*County-wide network of courts chooses [Infolinx WEB](#) for the tracking of its physical records, including Case Files, Admin and Miscellaneous Records, Exhibits and Media.*

(Vocus) November 10, 2009 -- [Infolinx System Solutions](#), a leading provider of enterprise physical records management software, announced the planned implementation of [Infolinx WEB](#) version 2.4, throughout the Superior Court of Riverside, California.

Consisting of a centralized records center and more than a dozen court locations responsible for hearing everything from civil and probate to criminal and grand jury cases, the county of Riverside has long been faced with the challenge of the timely delivery and retrieval of legal documents and evidence throughout the system. The implementation of a contemporary application like Infolinx WEB will improve the county's information flow while simultaneously enhancing their record audit capability.

"The benefits provided by Infolinx WEB including rapid information flow, complete audit history, and the elimination of missing records" said Tim Butler, Infolinx Managing Director, "will provide Riverside with a state-of-the-art records management solution crucial to fulfilling their critical mission."

[Public institutions](#) at state, county, and municipal levels, especially those managing large volumes of physical records such as records centers and court systems, continue to derive quick return-on-investment from the [functionality](#) provided by Infolinx WEB. Online search and request of information, robust report and security capability, space management, and retention and legal hold management are just some of the features native to an installed Infolinx solution.
